

Uploading a File

1. The first link is recommended if you have a Google account. You need to use this link, if you want a reply or are exchanging/trading resources. This one is sent from your email.
2. The second link is just if you want to upload a single resource. Unfortunately, a reply can only be received if you include a valid email.
3. The last link is to upload multiple files (because it is hosted on MediaFire), a reply cannot be received if you use this uploader.
4. The email attached is an alternate way to email files or share Google Drive folders with.

This is what the first link looks like. Your email is prefilled by what you are logged in with Google Drive.

The screenshot shows a web interface for an application named 'thsconline'. The background is a solid light blue. At the top left, the text 'thsconline' is displayed in a bold, blue, sans-serif font. Below this, the text 'Logged in as thsconline@gmail.com' is shown in a smaller, grey font. Underneath, the instruction 'Please fill in a title and attach the file' is written in grey. There are two blue links with left-pointing arrows: 'Exit App' and 'Back to Uploader Selector Screen'. Below these links is a text input field labeled 'Title of File' in grey. The field is empty and has a light yellow border. Below the title field is a section labeled 'File' in grey. It contains a button labeled 'Choose File' in bold black text, followed by the text 'No file chosen' in a lighter grey font.

Add a title to your file, select a file and add a comment (optional).
